QMS Implementation and Maintenance Services

Bringing People, Technology and Quality Together

Quality Management System (QMS)

Implementation and Maintenance Services

Has a customer told you that you need a Quality Management System or Certification to be a part of their supply chain?

Business success may simply be the extent to which your organization can produce a higher-quality product or service than your competitors are able to do at a competitive price. When quality is the key to a company's success, quality management systems allow organizations to keep up with and meet current quality levels, meet the consumer's requirement for quality, retain employees through competitive compensation programs, and keep up with the latest technology.

Benefits of implementing a quality management system include:

- Increased involvement of top management with regards to the Quality Management System. This starts with the setting of the Quality Policy and Quality Goals and Objectives. It continues with Management Review looking at data from the QMS, and taking actions to make sure that Quality Goals are met, new Goals are set, and continual improvement is achieved.

- With the QMS in place and working for you, the organization is focused towards the Quality Goals.
- Management is provided with data on a continual basis and able to see progress or lack of progress towards goals and take appropriate action.
- Customer satisfaction increases are seen as Goals and Objectives take the customer needs into account.
- Customer needs are better understood as customer feedback is sought, received and analyzed. Goals and objectives are adjusted based on the information and the organization becomes more customers driven. Satisfaction increases are seen as Goals and Objectives take the customer needs into account.
- As goals focus on the customer, the organization spends less time focusing on individual goals of departments and more time working together to meet customer needs.
- understanding how statutory and regulatory requirements impact on the organization and your customers
- reduced wastage
- greater consistency and traceability of products and services
- improved morale and motivation
- Getting preferred vendor/supplier status.
- Improved return on investment
- Contract to Hire Placement Services
- Direct Hire Placement Services.

What we offer?

We assist organizations in implementing a new ISO based Quality Management System or maintain and improve the existing QMS. We make sure our clients are properly prepared for registration by tailoring our program to meet their particular needs.

AnumTech does not certify or register you to ISO 9000 or any other certification. We prepare and lead your organization to certification.

AnumTech's QMS Implementation Program is tailored to meet your organization needs.

When organizations write their own documentation, it can take up to few years. But with the AnumTech's QMS Implementation Program, documentation writing time is cut by as much as 80 percent.

Our QMS Implementation program services include:

- **Gap Analysis:** AnumTech can perform the gap analysis to compares the organization's current QMS, if any, to ISO standards, identifies nonconformities and recommends actions to achieve conformity.
- **Quality Manual Development:** AnumTech can help clients write a quality manual that meets the requirements of a variety of different quality management standards, including ISO standards for quality management systems.
- **Procedures Development:** Our consultants has over 14 plus years of experience writing Plans, procedures and work instructions, we can help clients write extensive Plans, SOPs or Work-instructions covering methods, strategies and principles used to perform QMS activities.
- **Business Continuity and Disaster Recovery Planning:** We can help clients write a robust Business Continuity and Disaster Recovery plan and can also help clients in conducting the verification test for the components defined in those plans.
- **Quality Training:** AnumTech's quality experts can design and conduct training workshops on a variety of environmental measurements and Quality Assurance topics to help clients satisfy the training aspect of QMS.
- **Internal Audit Assistance:** We have extensive experience performing internal audit and generating audit reports, we can help our clients monitor QMS implementation for conformity to ISO standards.
- **Corrective Action Assistance:** We can help clients put together a comprehensive Corrective and Preventive action (CAPA) plan and procedure and guide them through the CAPA process to document and address the QMS nonconformities found during internal audits.

Once the Quality Management System is successfully implemented, we can remain a partner in your journey through quality maintenance. AnumTech can support you maintaining your QMS, during your certification audit and at future surveillance audits conducted by your registrar. AnumTech's QMS Maintenance Program can perform this work in a cost-effective and efficient manner, tailored to fit the client's needs

Our QMS Maintenance program services include:

- **Internal Audits**, which are a crucial component in QMS checks and balances, for discovering a major nonconformity during an internal audit can prevent registration from being revoked during the subsequent surveillance audit. Our experience QMS auditors can conduct internal audits twice a year in a professional, efficient and even-handed manner.
- **Corrective Actions**, which are performed after surveillance audits to close out nonconformities.

Our QMS Maintenance Program frees up client personnel for regular job duties and costs less than committing a client employee to QMS upkeep.

Our Commitment is our Strength
